

# The European Alliance for Research Career Development in Context

## International Workshop

### DEVELOPING RESEARCH CAREERS IN AND BEYOND EUROPE

Dr Iain Cameron,

Head of Research Careers and Diversity, RCUK Strategy Unit

Chair, ESF MO-Forum Research Careers

Oslo, 22 May 2013

## Horizon 2020 – Excellent Science, Industrial Leadership and Societal Challenges

- H2020 - key tool to implement the Innovation Union Flagship Initiative
- EU needs at least one million new research jobs (outside academia) to reach the R&D target of 3% of GDP. (*Innovation Union*)
- The number of researchers required is significantly higher, as many researchers will retire over the next decade. (*Innovation Union*)
- By the end of 2011, Member States should have strategies in place to train enough researchers to meet their national R&D targets and to promote attractive employment conditions in public research institutions. (*Innovation Union Commitment #1*)
- 90% of research funding in Europe is not directly from the EU

## Global trends – EUA view\*

- CODOC report compared three world regions with developing, emerging and developed countries (East Asia, Latin America and Southern Africa) with Europe.
- Three major convergences can be identified:
  - Producing doctorate holders who can contribute to economic growth and social development.
  - Training doctorate holders for higher education **and** an increasingly knowledge-dependent private sector.
  - An emphasis on collaboration

\* CODOC – Cooperation on Doctoral Education between Africa, Asia, Latin America and Europe; EUA 2012 - <http://www.eua.be/codoc.aspx>

## Understanding Researchers: Anticipation of an academic career!

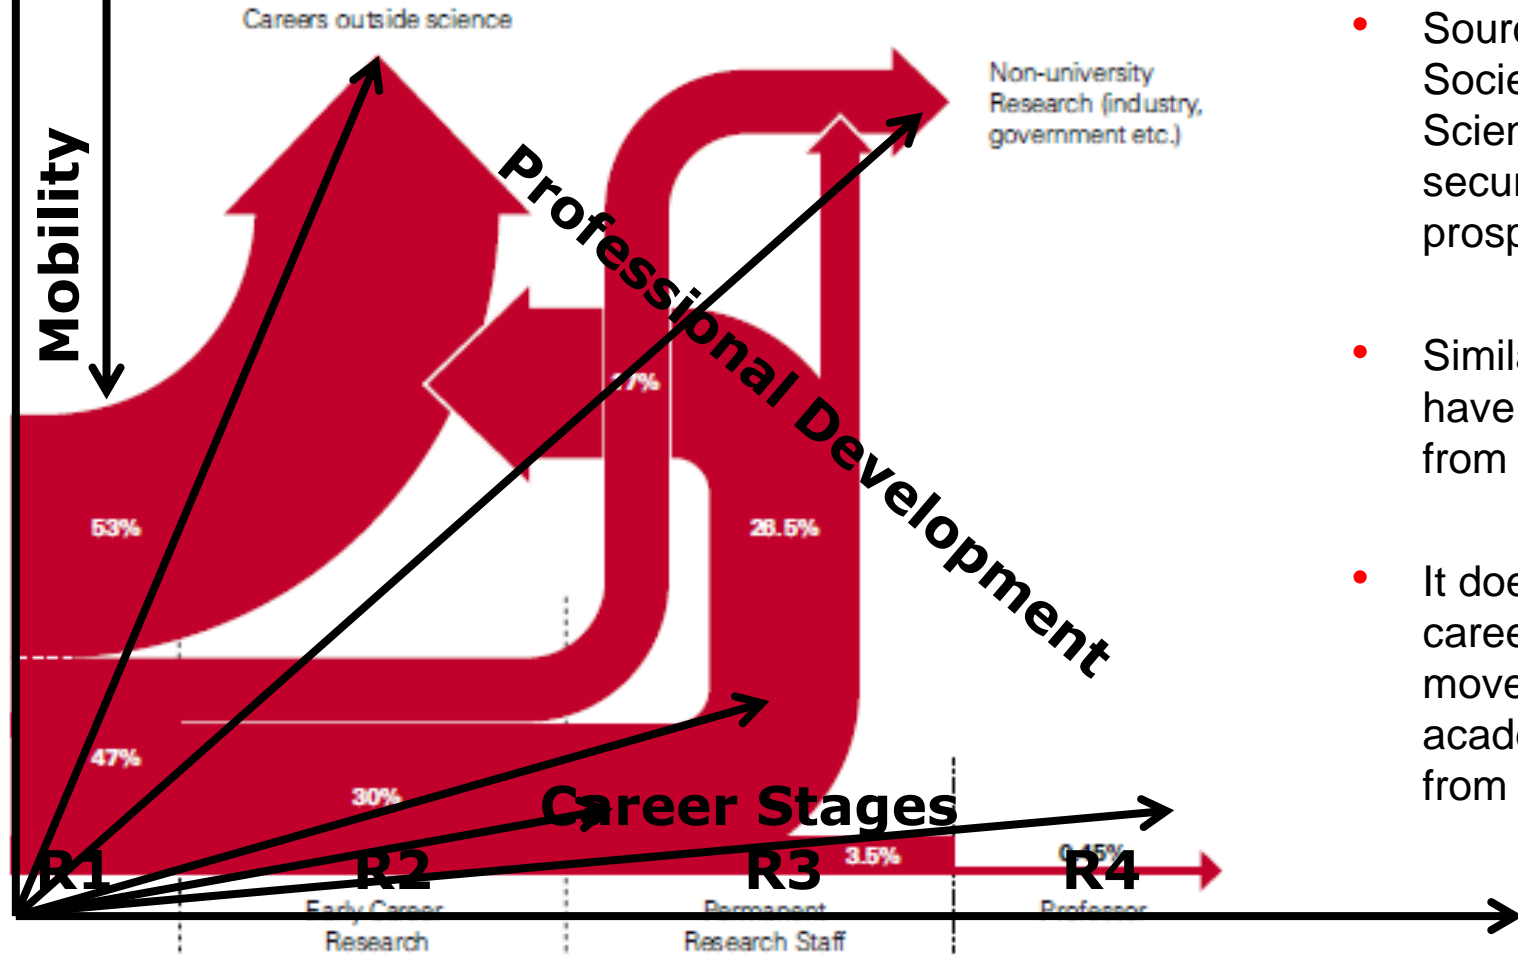

- >75% of PhDs want to work in academia after graduating  
(EURODOC Survey 2011)
- *“Most European researchers are trained in universities, and most fundamental research is undertaken in them.”* (LERU – Harvesting Talent 2010)
- *“Researchers frequently assume that an ultimate destination other than that of a permanent university post represents failure.”* (LERU – Harvesting Talent 2010)
- *“No sweet outcome for PhD worker bees – ESOF conference hears that many students are 'mis-sold' an academic career”*  
(Times Higher Education 2012)

## Employability outside HE

- 45% of PhDs want to work in non-academic research and 22% in a private non-research job after graduating (*EURODOC Survey 2011*)
- “An estimated 50% of current doctorate holders are employed outside academia - research and non-research positions.” (*EUA DOC-CAREERS 2009*)
- “Collaborative doctoral programmes ... are seen as an excellent way to improve candidates’ ability to relate abstract thinking to practical applications.” (*EUA DOC-CAREERS 2009*)
- Employers appreciate the scientific/technical knowledge of PhDs including: formal approach to evidence-based arguments, analytical skills, ability to integrate knowledge from different sources and their ability to work at the frontiers of knowledge. (*EUA DOC-CAREERS 2009*)

# Transition points in typical academic scientific careers following a PhD and the outflow of scientifically-trained people into other sectors.

Figure 1.6 Careers in and outside science

- Source: The Royal Society – The Scientific Century: securing our future prosperity (2010)
- Similar diagrams have been presented from other Countries.
- It does not show career breaks or moves back into academic science from other sectors.

# Trajectories - Career tracking and Policy needs

- Justify **public investment** in doctoral training including:
  - effect of changes in policy
  - adaptation of funding instruments
- Ensure the **supply** of highly-skilled people for academy, industry, business, Government and 3<sup>rd</sup> sector
- Describe the contribution (**impact**) of doctorates in the economy
  - economic, social and cultural impact
  - relative contribution of UK, other EU and non-EU doctorates
- Demonstrate **attractiveness** of a research career
- Provide **career information** for prospective/current doctorates
- Ensure that **skills** training supports the careers of researchers
- Provide **database** for future policy/academic study

# What do researchers do? - occupations all disciplines

# Trajectories – Career Stages/Frameworks

- Taxonomy of careers (ESF)

- Harvesting Talent (LERU)

**Box 1 - Four-stage career framework**

**Typical Academic Career Opportunities**

Phase	Typical Career	Activities	Control Type
Phase 1	Doctoral Candidate	Supervised research and teaching; teaching assistants	FixedTerm (3-6 years); FixedTerm (2-3 years); FixedTerm (3-4 years)
Phase 2	Post-doctoral / S-dentist	Research; research team leadership; teaching and mentoring	FixedTerm (3-5 years); FixedTerm (3-5 years); FixedTerm (3-5 years)
Phase 3	University S-dentist	Research and supervision; teaching and programme management; research, teaching and programme management	FixedTerm (3-5 years); FixedTerm (3-5 years); FixedTerm (3-5 years)
Phase 4	Professor	High-level research, leading and leadership; research; teaching and mentoring	FixedTerm (3-5 years); FixedTerm (3-5 years); FixedTerm (3-5 years)

- European Framework for Research Careers (ERA-SGHRM)

**R1 First Stage Researcher**  
up to the point of PhD

**R2 Recognised Researcher**  
PhD holders or equivalent who are not yet fully independent

**R3 Established Researcher**  
researchers who have developed a level of independence.

**R4 Leading Researcher**  
researchers leading their research area or field

- Where next – practical uses?

# The European Framework for Research Careers (EFRC)

Four broad profiles for researchers, independent of any particular sector, with the following working titles:

- ***R1 First Stage Researcher***
  - *up to the point of PhD*
- ***R2 Recognised Researcher***
  - *PhD holders or equivalent who are not yet fully independent*
- ***R3 Established Researcher***
  - *researchers who have developed a level of independence.*
- ***R4 Leading Researcher***
  - *researchers leading their research area or field*

A framework for: Jobs, competencies and skills, training, funding instruments, presenting workforce statistics and data

# Trajectories - Towards a European Professional Development Framework for Researchers

**ESF MO-Forum** - Definition of transferable skills and recommendations on skills (2009)

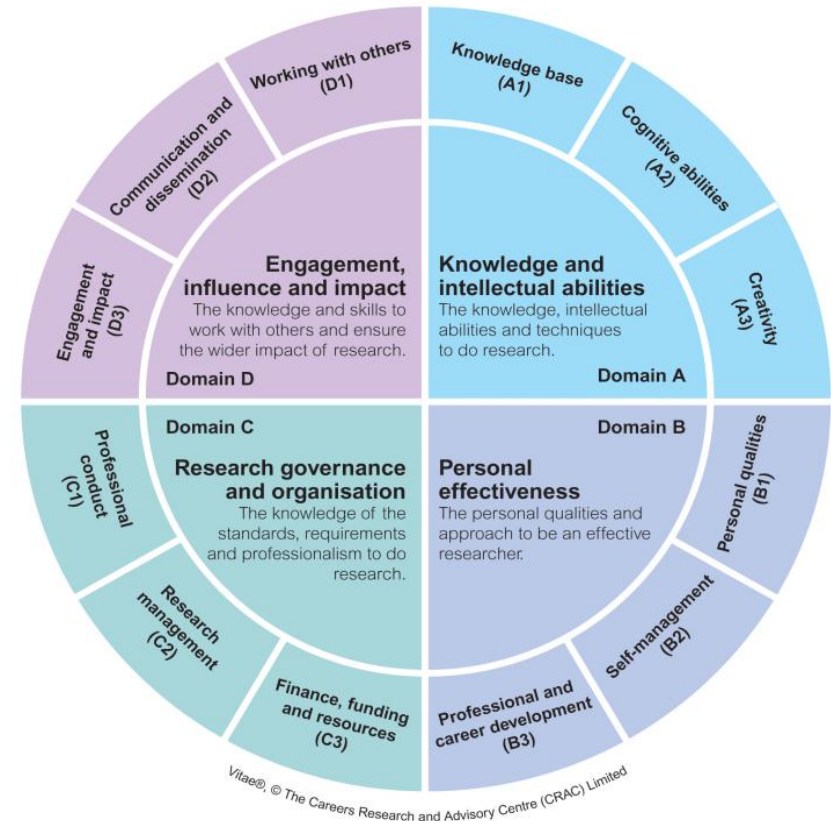

**EC (DG Research) WG report on Skills** – Professional Development of Researchers – Provisions for the Future. (2012)

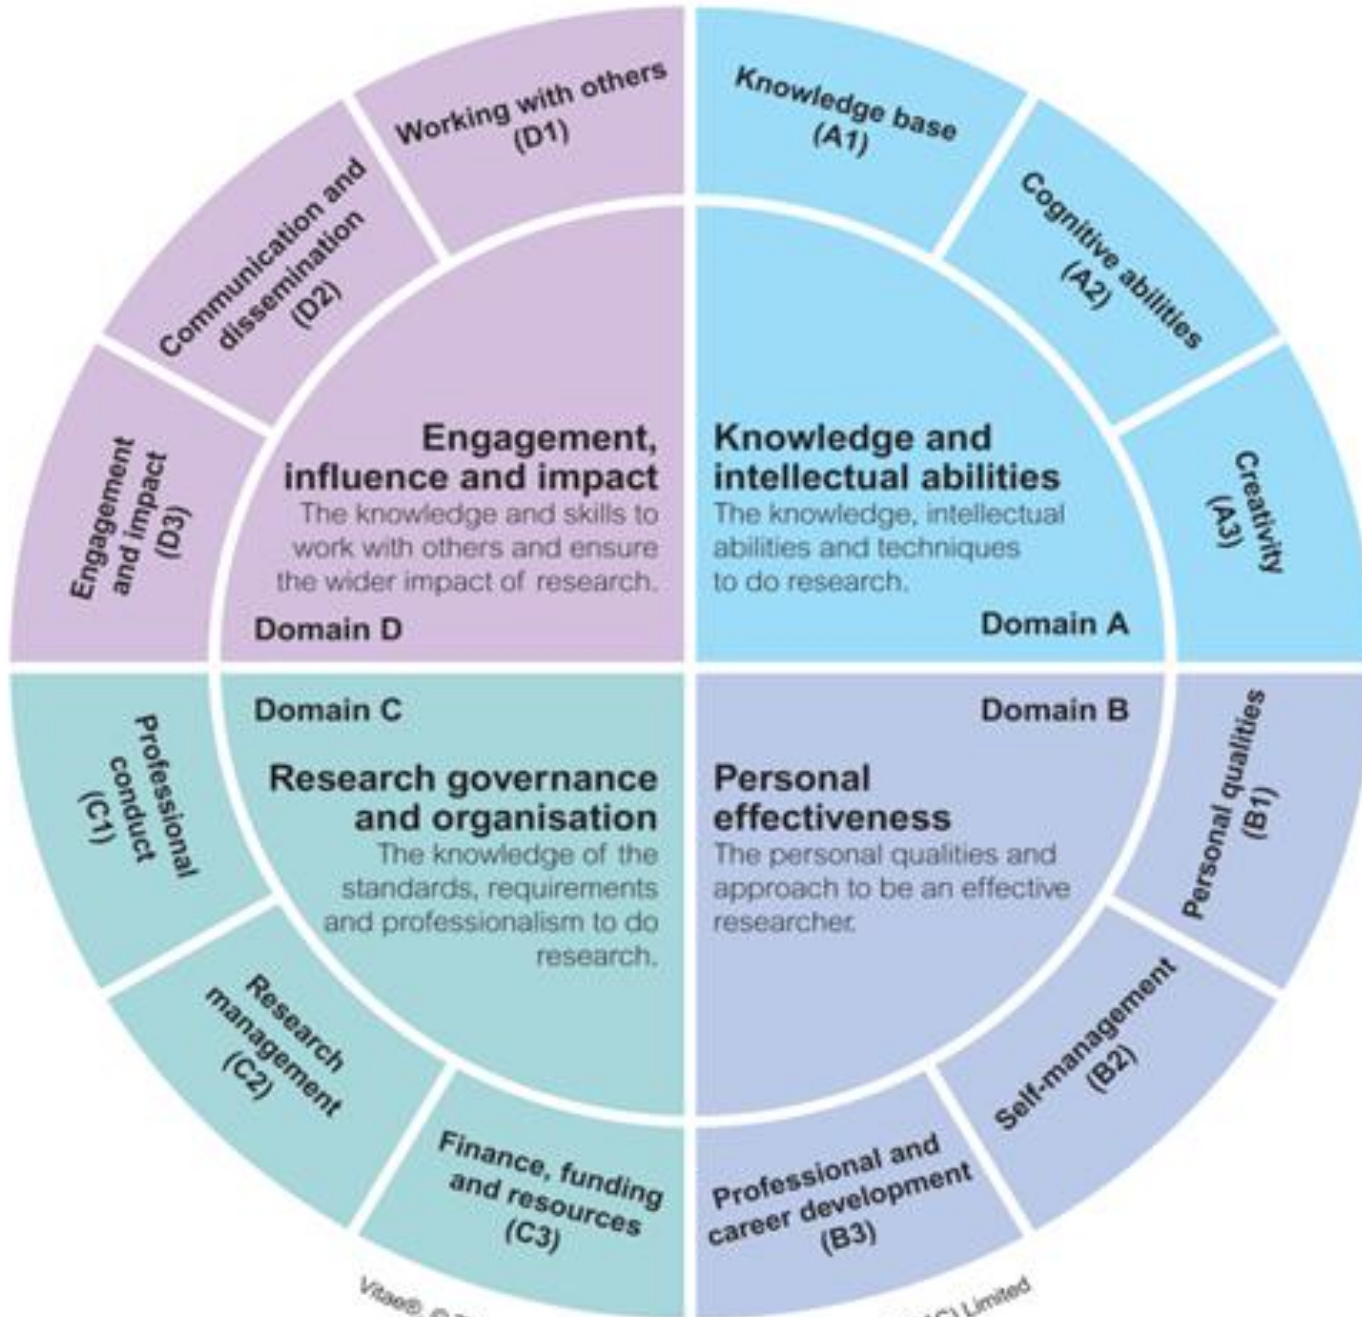

**ESF Pilot study** – a pan-European Researcher Development Framework for Researchers. (2012)

- Both reports refer to Vitae’s Researcher Development Framework (Vitae 2012).
- Both reports recommend institutional level provision for researcher development.
- Together the reports recommend increased provision across career stages and a European Framework for Professional Development.
- **EC (DG Research)** – Currently planning next steps

# Researcher Development Framework (RDF) - 2011

- **Major new approach** to researcher development
  - evolution of the **Joint Skills Statement** and research staff
  - describes **knowledge, behaviours and attributes** of researchers at different stages of development
  - providing a **language for communicating researcher qualities**
- **Researcher Development Statement endorsed by key stakeholders**
- **RDF website**
  - resources, FAQs
  - researcher profiles
  - JSS mapping
- **Professional development tool**
- **RDF lenses**

## Trajectories - Mobility

- The concepts are understood:
  - International
  - Intersectoral
  - Interdisciplinary
  - Virtual
  
- Some questions:
  - How do these impact at different career stages
  - Do we really understand the impact of mobility on people and knowledge generation
  - Disciplinary differences

# Routes to improving employability

- Understanding career options – e.g. What do Researchers do? (Vitae UK)
  - First and subsequent destinations by subject
  - Career profiles/stories
  - Career profiles/stories of doctoral entrepreneurs
  - Doctoral graduate destinations and impact three years plus
- Understanding the value of mobility
- Recognising and acquiring competencies and skills – a Researcher Development Framework.
- Sources of help – peers, careers advisors, Supervisors/Principal Investigators

## Over to you!

Have we finished or have we only started?

- ESF MO-Forum Research Careers 2007-2010
- ESF MO-Forum EARCD 2010-2013
- Science Europe WG on Research Careers 2013 - ????

Thank you for your attention
