### **Project description and deliverables of the meeting**

Our long-term goal is to develop an attention-based theory of attitude ascription, and apply it to a wide range of data from experiments with children as well as adults. We plan a series of experiments along the lines of Friedman and Leslie (2004a,b). To start with, we intend to run a number of studies to clarify and, possibly, correct the findings obtained by Leslie and his associates. As part of the current project, we would like to test both children and adults on an eye-tracking version of the avoidance false-belief task with three containers. According to the results reported by Friedman and Leslie (2004b), while children who are able to pass this task show a preference for the box that contains the frog, adults show a bias for the empty box (i.e., the second correct answer). We believe that this difference might be explained by the fact that, whereas children in these experiments were able to respond to the prediction question in their own time, adults were specifically asked to give the first response that came to mind. Adults may have therefore gone for the “fastest and safest” solution, given that Sally was trying to avoid the frog. Moreover, by using a computer version of the task with an eye-tracking technique, we will obtain not only participants’ responses and response times to the prediction question, but also a continuous measure of processing in their eye movements.

Unfortunately, Professor Gerry Altmann had to cancel our appointment on very short notice because of his mother’s illness. Since Bart Geurts and I had made all our travel arrangements for the meeting, we decided to meet in London nonetheless and work on the draft of our paper on adult false-belief reasoning, as planned. Our work turned out to be very productive and we hope to submit our paper to *Psychological Science* shortly.

Fortunately, Chris Cummins was in London at the time and was kind enough to meet with us on two occasions. We took this opportunity to discuss the negative reviews we had just received for our paper on the use of colour adjectives in referential communication (which is also funded by an XPrag Short Visit Grant). Having carefully read both the manuscript and the reviews, Chris offered us very valuable advice on the new statistical analyses we need to carry out and various other issues that the reviewers had with the materials. After our meeting with Chris, Bart and I agreed on a ‘strategy’ to tackle the revisions and resubmit the paper.

### **EDUCATION AND RESEARCH**

---

Post-Doctoral Research Project  
University College London / Princeton University (2005 – 2010)  
*Inferential processes in language interpretation.*

Ph.D.  
University of Cambridge (2001– 2005)  
*Pragmatic processes and cognitive mechanisms in lexical interpretation.*  
Ph.D. Thesis approved *without corrections*

M.Phil. in English and Applied Linguistics  
University of Cambridge (2000 – 2001)  
*Distinction with Honours*

Research Stay  
University College London (2000)

M.A. in Theoretical Linguistics  
University of Reading (1998 – 1999)  
*Distinction with Merit*

Certificate in English Studies  
Coventry University (1996 – 1997)  
Erasmus Programme

First Degree in Spanish Language and Literature  
Universidad de Oviedo, Spain (1994 – 1999)

### **RECENT AWARDS**

---

Economic and Social Research Council (ESRC) International Training and Networking Opportunities for Early-Career Researchers (2010-2012)

Marie Curie Outgoing International Fellowship (2006-2010)

British Academy Post-Doctoral Fellowship (2005-2008)

### **INVITED TALKS AND CONFERENCE PRESENTATIONS SINCE 2004**

---

June 2009. 'A third theory of pretense', invited talk given at the workshop on *Metarepresentation and Non-Literal Language Use*, CSMN, Oslo.

July 2008. 'Eye-tracking the classic Sally-Ann task: An investigation of on-line adult Theory of Mind', poster presented at the *XXIX International Congress of Psychology*, Berlin.

May 2008. 'What can Sally and Ann tell us about adult theory of mind?' poster presented at the *20<sup>th</sup> Annual Convention of the Association for Psychological Science*, Chicago (USA).

May 2008. 'Does communication depend on our ability to take the speaker's perspective?' paper presented at a meeting of the RoLaP group (*Research on Language at Princeton*).

April 2008. 'What can Sally and Ann tell us about adult theory of mind?' poster presented at the *Workshop on Pragmatics and Social Cognition*, UCL (London).

April 2008. 'How egocentric are we? Or rather, how good are we at taking other people's perspectives?' paper presented at the *2008 British Academy Post-Doctoral Symposium*, London.

Aug 2007. 'Do ducks lay eggs? How people interpret generic assertions', paper presented in collaboration with Sangeet Khemlani, Sarah-Jane Leslie and Sam Glucksberg at the *2007 Meeting of the Cognitive Science Society (CogSci07)*, Nashville (USA).

April 2007. 'Associative and inferential processes in lexical interpretation', paper presented at the *Cognitive Research Seminar* of the Psychology Department, Princeton University (USA).
