

Final report for meeting August 2010 in Lyon

Children's comprehension of apparently irrelevant and under-informative utterances

This visit allowed us to finalise the design of the experiment in the lab where the study is taking place. We viewed videos of a pilot study and made some changes to the design in response to this study and to the constraints of testing in Lyon (which became apparent during the visit). We also finalised the counterbalancing and planned recruitment and testing. We briefly discussed procedures for the statistical analysis of the results.

We agree to meet again once the final data set has been collected. The next meeting will be in Sheffield, UK.

We have submitted an abstract based on this project for presentation at the Society for Research in Child Development biennial conference in Montreal March-April 2011.
