

EuroMinSci

European Mineral Sciences Initiative

EuroMinSci open session at the EGU General Assembly 2007

GMPV20/BG5.10 – Mineral properties and behaviour: the European Mineral Sciences Initiative (EuroMinSci) open session (including the EMU Research Excellence Medal Lecture) (co-organized by BG) (co-listed in CR, NP, SSP)

www.cosis.net/members/meetings/sessions/information.php?p_id=240&s_id=4635

Session co-sponsored by the ESF-EuroMinSci Programme (www.esf.org/eurominsci)

Session Abstract

Major advances in the use of physics-based experimental techniques (nuclear magnetic resonance spectroscopy, synchrotron radiation, neutron scattering, phonon spectroscopy, laser-ablation based techniques, etc.) and atomistic computer simulation make it possible to study mineral properties and behaviour. In addition, measurements of many minerals properties in situ at extreme conditions of temperature and pressure corresponding to those existing in the earth's interior are now feasible (e.g., the recent, experimental and theoretical determination of the temperature at the inner core – outer core boundary and the study of the Earth's core chemistry). The EuroMinSci Programme draws together the experimental and computational activities, and the different experimental techniques, into integrated research projects in this field. It focuses on the atomistic understanding of structures, properties and processes of minerals. This open session will offer in particular an overview of the EuroMinSci programme, which is supported by national funding agencies from 10 European countries from Austria (FWF), Belgium (FWO, FNRS), Czech Republic (CSF), Estonia (ETF), France (CNRS), Germany (DFG), Hungary (MTA), Italy (CNR), Slovakia (SAV), Spain (MEC), Sweden (VR), United Kingdom (NERC), and the European Science Foundation (ESF), thanks to contract ERASCT-2003-980409 of the EC, DG Research.

Session Conveners

Bjoern Winkler
Mineralogy / Crystallography
Johann Wolfgang Goethe University
Senckenberganlage 30
60054 Frankfurt am Main
Germany

Bernard Avril
European Science Foundation
1 quai Lezay-Marnesia
67000 Strasbourg
France
E-mail: eurominsci@esf.org

Oral Programme

Tuesday, 17 April 2007; Lecture Room: Lecture Room 20 (N)

Chairperson: Bjoern Winkler

13:30 - 13:45 – Winkler, B.; Friedrich, A.; Wilson, D.; Haussühl, E.; Refson, K.; Probert, M.; Gale, J.; Milman, V.
Structure and properties of hydrous minerals from experiment and computation

13:45 - 14:00 – Calvet, M.; Margerin, L.

Calculation of effective seismic properties of untextured crystal aggregates and application to inner core crystallisation

14:00 - 14:15 – Fabian, K.; McEnroe, S.; Robinson, P.

Lamellar magnetism carries the natural remanent magnetization in ilmenohematite from Modum, Norway

14:15 - 14:30 – Kantor, I.; Dubrovinsky, L.; McCammon, C.

Pressure-induced spin crossover in ferropericlase: an alternative concept.

14:30 - 14:45 – Friedrich, A.; Haussuehl, E.; Wilson, D.J.; Boehler, R.; Morgenroth, W.; Winkler, B.; Juarez-Arellano, E.A.; Refson, K.; Milman, V.

Structure and properties of diaspore, AlO(OH), up to 50 GPa from experiment and theory

14:45 - 15:00 – Walte, N.P.; Heidelbach, F.; Rubie, D.C.; Frost, D.J.

LPO and Perovskite–post-Perovskite phase transition of CaIrO₃ during deformation with the d-DIA: Implications for the D'' layer

Chairperson: Bernard Avril.

15:30 - 16:00 – Bindi, L.

From the invalidity of the law of rational indices to the concept of superspace: A crystallographic excursion in the modulated world of minerals; solicited - **EMU Research Excellence Medal Lecture**

16:00 - 16:15 – Olsen, LA; Balic-Zunic , T; Makovicky, E

From lillianite to α -Pb₃Bi₂S₆: a crystal chemical study of Pb₃Bi₂S₆ at high pressure

16:15 - 16:30 – Cuif, J.P.; Dauphin, Y.; Nouet, J.

Nano-crystallization within chemically active glyco-protein hydrogel layers: a possible origin for the long-standing vital effect enigma in the Ca-carbonate skeletons.

16:30 - 16:45 – Blanchard, M.; Wright, K.

Incorporation modes of hydrogen in ringwoodite: a DFT study

16:45 - 17:00 – Tatham, D.; Prior, D.

In situ heating and deformation experiments in the SEM

Poster Programme

Poster Area: Hall A

Display Time: Tuesday, 17 April 2007 08:00 - 19:30

Author in Attendance: Tuesday, 17 April 2007 08:30 - 10:00

A0105 – Avril, B.

EuroMinSci Programme - An overview

A0106 – Perchuk, A. ; Schertl, H-P.; Burchard, M.; Maresch, W.V.; Gerya , T.V.; Bernhardt , H-J.

Diffusivities of major divalent Cations in Gem quality and chemically heterogeneous Garnets: multi-couple Experiments

A0107 – Perchuk, A.; Vidal, O.

Diffusion couple Experiments in Garnets: Effect of grain boundary Diffusion owing to 2D numerical Modeling

A0108 – Prokof'ev, V.; Baksheev, I.; Zorina, L.; Kryazhev, S.

Conditions of tourmalinization formations Eastern Transbaykalia gold deposits, related with mesozoic riftogenic volkanism (Russia)

A0109 – Fabian, K.; Shcherbakov, V. P.; McEnroe, S.; Robinson, P.

A mean field model of the magnetic structure in hematite-ilmenite solid solutions and exsolved nanostructures of ilmenite and hematite

A0110 – Méheut, M.; Lazzeri, M.; Balan, E.; Mauri, F.

Prediction of stable isotopes fractionation by first-principles methods

A0111 – Deguen, R.; Alboussière, T.; Brito, D. ; La Rizza, P.; Masson, J.-P.

Ultrasonic monitoring of dendritic solidification under a pressure gradient

A0112 – Becker, J.K.B.; Bons, P.D.B.

A new approach to 3D front-tracking simulation of grain growth

A0113 – Pennock, G.M.; Drury, M.R.

The effect of deformation on subgrain misorientations

A0114 – Nouet, J.; Cuif, J.P.; Pradel, P.

Differential crystallization of high-magnesian calcites in the cortical spicules and axes of the red coral (*Corallium rubrum*) correlated to the biochemical compositions of their mineralizing matrices

A0115 – Nehrke, G.; Van Cappellen, P.; Bijma, J.

Calcite growth rate and solution stoichiometry, implications for biomineralizations

A0116 – Dauphin, Y.; Cusack, M.; Ortlieb, L.

Nanogranules in carbonate skeletons: a universal scheme?

A0117 – Valcke, S.L.A.; Drury, M.R.; Pennock, G.M.; De Bresser, J.H.P.

Quantifying heterogeneous microstructures: core and mantle subgrains in deformed calcite

A0118 – Grieria, A.; Jessell, M.W.; Evans, L.

Simulation of subgrain scale deformation and its effect on recrystallisation

A0119 – Brigatti, M.F.; Malferrari, D.; Poppi, M.; Mottana, A.; Cibin, G.; Marcelli, A.; Cinque, G.

Interlayer potassium and its surrounding in micas: Crystal chemical modeling and XANES spectroscopy

A0120 – Dubacq, B.; Vidal, O.; Lewin, E.; Vieillard, P.

Prediction of enthalpy of formation of minerals: application to solid solutions and low-temperature compounds

A0121 – Yudintsev, S.; Livshits, T.; Omelianenko, B.

Examination of natural and synthetic minerals as matrices for actinide waste immobilization

A0122 – Sendir, H.; Saryiz, K.

Geochemistry and mineralogy of the chromitites and their platinum group minerals in the Karaburhan (Sivrihisar-Eskişehir-Turkey) region

A0123 – Krivolutskaya, N.A.; Sobolev, A.V.; Kuzmin, D.V.; Svirskaya, N.M.

Olivines composition data to the origin of the Noril'sk deposits (Siberian trap provincece, Russia)

A0124 – Zarrinkoub, Dr

Antimony – gold mineralisation and structural controls in south Nehbandan, East of Iran

A0125 – Zareisahamieh, R

Mineralogical and Geochemical Characteristics of Tafresh(Central Iran)

A0126 – Seaman, S.; Helfrich, E.; Dyar, D.; Smith, R.

Synchrotron FTIR analysis of water concentration variations in skeletal sanidine crystals hosted by spherulites in the Hell's Gate rhyolitic lava flow, southern Arizona, USA

A0127 – Hamann, I.; Azuma, N.; Weikusat, Ch.

Evolution of ice crystal microstructures during creep experiments

A0128 – Salje, E.K.H

Fast Ionic Transport along Interfaces in Minerals

A0129 – Haghnaz, M.; Esmaeily, E.; Kosari, A.

Electron microprobe and mineralogy evidence for the genesis of Scheelite and Tourmaline at the Nezamabad area, western Iran
