

# ESF RNAQuality workshop for PhD students and Postdocs

*A workshop for PhD students and postdocs working in labs that participate in the ESF RNAQuality programme.*

**Date : 29-30 April 2010**

**Location : Strasbourg, France**

## Description of the workshop

This workshop will provide an opportunity, especially for recently starting students and postdocs, to discuss with fellow students and postdocs their work in progress - even though perhaps not publishable yet - and the problems they encounter.

To create an environment for low-threshold discussion this workshop is open to PhD students and postdocs only. Work will be presented in oral presentations. Speakers are encouraged not only to present their results but also the methods used and the problems they encounter to stimulate constructive discussion. This might lead not only to finding answers to problems using other peoples' expertise, but also provides possibilities for networking and potential starts of more long-term collaborations.

## Application deadline : 8 January 2010

Filled out application forms are to be sent to Tonnie van den Elzen: [elzen@igbmc.fr](mailto:elzen@igbmc.fr)

In case the number of applications exceeds capacity, a selection will be made, aiming for equal participation of all labs.

## Application deadline for presentations : 1 March 2010

Abstracts of the presentations are to be sent to Tonnie van den Elzen: [elzen@igbmc.fr](mailto:elzen@igbmc.fr)

**Accommodation, meals and travel expenses will be covered by ESF funding.**

## Organization :

Karolina Drazkowska (*PhD student in the lab of Andrzej Dziembowski, Warsaw University*)

Tonnie van den Elzen (*PhD student in the lab of Bertrand Séraphin, IGBMC, Strasbourg*)

Silvia Jimeno Gonzalez (*Postdoc in the lab of Torben Heick Jensen, University of Aarhus*)

Helene Malet (*Postdoc in the lab of Helen Saibil, Birkbeck College, London*)

Delphine Rispal (*PhD student in the lab of Bertrand Séraphin, IGBMC, Strasbourg*)

Rafal Tomecki (*Postdoc in the lab of Andrzej Dziembowski, Warsaw University*)

Georgia Vendra (*Postdoc in the lab of Michael Kiebler, Medical University of Vienna*)

Eleanor White (*Postdoc in the lab of Nicholas Proudfoot, Oxford University*)
