

*Today is the end of the B cell meeting
Being grateful to organisers we send them greeting!
Rita and Deborah, thank you for putting the program together
and letting us to enjoy this fabulous weather.*

*Everyone here will surely agree
that in immunology the top cell is B!
Germinal center, bone marrow, Peyer's patches and spleen
There is no place B cell has not been seen!
Whether it's antibody or cytokine
The complexity is almost divine
We can only hope that we're in the middle
Of solving this fascinating riddle
Of course we don't want to solve it too fast...
Because we want this series of meetings to last!*

*Let's make it short and don't waste the time,
Besides, we are running out the rhyme.
In order to show we love this coast
Let's raise the glasses and make a toast!*

(a kind gift from the participants of the "B cells Back to Basics Conference", presented during the gala diner the 16 June 2011)
