## Images and Visualisation: Imaging Technology, Truth and Trust

17 - 21 September 2012

Chaired by:

**Brigitte Nerlich**, Nottingham Uni., UK

**Andrew Balmer**, Manchester Uni., UK

**Annamaria Carusi**, Copenhagen Uni., DK

*Please circulate this announcement among your colleagues and contacts*

## Programme

Both Leonardo da Vinci and John Constable claimed that painting is a science. This science has been explored extensively in traditional aesthetics and art history. Given recent advances in science and visual engineering, creating images for science, of science and for the translation (interpretation) of science has become at one and the same time commonplace, even easy, and even more scientific. The aim of this conference is to bring together experts from across the natural and social sciences, with curators, artists, producers and users of images based on advanced visual engineering.
