

PRIORITIES IN THE HUMANITIES IN THE REPUBLIC OF CROATIA

1. Ethical and bioethical research – interdisciplinary research connected with other research areas (e.g. research in medicine, the natural sciences, the technical sciences, the social sciences etc.),
2. Collecting, documenting and digitalizing Croatian literary, scholarly, philosophical, theological etc. material as well as research and publication of these documents,
3. Collecting, researching and documentation of Croatian archaeological, historical, art history, anthropological, ethnological and ethno musicological material with the aim of preserving the Croatian national identity,
4. Theoretical and applied research in the philologies,
5. Further work on compiling the corpus of the Croatian language,
6. Language technologies for the Croatian language,
7. Research on cultures, literatures as well as historical and art history of other world cultures.
