

EUROPEAN SCIENCE FOUNDATION

## ESF PiShift Workshop

Josephson junctions. Basic studies and novel applications

16-19 June 2003. Jena, Germany

Best Western Hotel Jena

### Scope of the conference:

The conference will focus on basic studies on Josephson junctions in all superconductors and on novel applications utilizing Josephson junctions. This workshop is the third in a series of meetings and conferences within the framework of the Pishift programme of the European Science Foundation and follows the very successful first and second workshops held in Augsburg (Germany) and San Feliu de Guixols (Spain), respectively. More information on the conference, the venue, and financial support through the ESF PiShift program can be found at the conference website: [www.ipht-jena.de/pishift](http://www.ipht-jena.de/pishift).
