## Research Networking Programme

### European Medical Research Councils (EMRC)

Translational Research on Antimicrobial resistance  
and Community-acquired infections in Europe

Ontwerp: Natacha Hoevenaegel - Nieuwe Media Dienst

ESF Research Networking Programmes are funded by the Foundation's Member Organisations and other funding agencies on an à la carte basis. TRACE is supported by:

- **Bond University**  
Robina | Gold Coast | Queensland | Australia
- **Fonds voor Wetenschappelijk Onderzoek - Vlaanderen (FWO)\***  
Research Foundation Flanders Belgium
- **University of Antwerp**  
Belgium
- **University of Gent**  
Belgium
- **Chinese University Hong Kong**  
Division of Family Medicine School of Public Health and Primary Care | China
- **University of Copenhagen**  
Denmark
- **Suomen Akatemia\***  
Finlands Akademi | Academy of Finland | Finland
- **Comité Départemental d'Education pour la Santé of the o6 area (CODES o6)**  
France
- **Collège Azuréen des Généraliste Enseignants (CAGE) | France**
- **University of Rostock**  
Germany
- **Nederlandse Organisatie voor Wetenschappelijk Onderzoek (NWO)\* | Netherlands**  
Organisation for Scientific Research | The Netherlands
- **University of Amsterdam**  
The Netherlands
- **University of Leiden**  
The Netherlands
- **University of Utrecht**  
The Netherlands
- **Norges Forskningsråd\***  
Research Council of Norway Norway
- **University of Tromsø**

United Kingdom
- **University of Southampton**  
United Kingdom
- **University of Oxford**  
United Kingdom
- **University of Cardiff**  
United Kingdom

Uncertainties in infectious disease management have resulted in prescriptive promiscuity, which largely explains the escalating antibiotic resistance of common bacterial respiratory pathogens in the community. Technologies and solutions are available to address these issues, and the individual areas of expertise do exist in Europe, but the problem is in integrating these.

Therefore, TRACE (Translational Research on Antimicrobial resistance and Community-acquired infections in Europe) was launched on Thursday June 16 2011, in Antwerp, supported by ESF (European Science Foundation), 17 GRACE (Genomics to combat Resistance against Antibiotics in Community-acquired LRTI in Europe; ([www.grace-lrti.org](http://www.grace-lrti.org))) and 5 other partners. TRACE aims to consolidate the expertise integrated in several research programmes, in particular within the GRACE Network of Excellence, beyond EC funding, and to apply it to steer ongoing and to deploy new research activities, and to disseminate its results.

GRACE has been a unique and successful Network of Excellence encompassing 20 Primary Care Networks in 15 EU countries, human and microbial genomics, collaboration with the major infectious disease and primary care societies, SME's, integrated by means of state-of-the-art ICT. The GRACE concept serves as a model for TRACE aiming to complement the ongoing activities substantially.

TRACE will produce a brochure, a website and a newsletter. To disseminate the results of GRACE, but also of other EU funded projects like CHAMP ([www.champ-antibiotics.org](http://www.champ-antibiotics.org)) and HAPPY AUDIT ([www.happyaudit.org](http://www.happyaudit.org)) represented by their coordinators in TRACE, train-the-trainer courses will be organised. For that purpose, we are also very grateful that the European Respiratory Society (ERS; [www.ersnet.org](http://www.ersnet.org)) is willing to maintain the GRACE e-learning platform ([www.grace-edut.org](http://www.grace-edut.org)), established with the support of both the European Society of Clinical Microbiology and Infectious Diseases Europe (ESCMID; [www.escmid.org](http://www.escmid.org)) and ERS. In addition, TRACE will facilitate the development of new translational research applications and sustain the expertise in this field.

Together with our partners in 16 EU countries, and our partners in Australia and Hong Kong\*, we truly hope that TRACE will succeed in sustaining the translational research on antimicrobial resistance and community-acquired infections in Europe and beyond, and in providing compelling evidence for the wisdom of further investment in Networks of Excellence in Europe.

Herman Goossens, *Coordinator (Chair)*

Samuel Coenen, *Manager*

\* An International Coordination Action granted by the Research Foundation - Flanders (FWO) supports TRACE internationally (iTRACE).
