# **ULIS 2011**

## 3<sup>rd</sup> International Conference on **Ultraintense Laser Interaction Science**

### **Final Report**

November 14, 2011

## Summary

The third edition of the International Conference on Ultraintense Laser Interaction Science - ULIS2011 - took place in Lisbon, Portugal, from October 10th to 13<sup>th</sup>, 2011. The conference was hosted by the Institute for Plasmas and Nuclear Fusion (IPFN), a research unit of Instituto Superior Técnico (IST) - Technical University of Lisbon.

The ULIS series of conferences is aimed at researchers involved in experimental, numerical or theoretical studies on Strong Field or Ultra-High Intensity science (UHI) and Inertial Fusion for Energy (IFE), representing an outstanding opportunity to gather and compare their expertise and then to federate these communities. The success of ULIS 2007 and 2009 confirmed the necessity of a regular meeting on these complementary fields. Therefore, at the 2009 edition IPFN/IST researchers proposed to organize the current edition.

## Topics

The topics of ULIS 2011 were:

- New Laser Sources: High Energy - High Power
- Fundamental Processes at Ultra-High Intensity
- Relativistic Optics in Plasmas
- Advanced IFE Schemes including Fast Ignition and Shock Ignition
- Laser-driven Particle Accelerators and their potential uses
- Secondary Sources, Applications and Radioprotection Issues
- Attosecond science

## Preparation

The conference dates were chosen in order to avoid overlap with other conferences aimed at the same scientific audience that took place at the same time of the year, e.g. IFSA Bordeaux (Sep. 12-16), UFO Monterey (Sep. 25-30), FiO San Jose (Oct 16-20), LEI Szeged (Nov 14-18). The ULIS Scientific Committee was contacted in order to approve the dates and to suggest invited speakers (*see list below*) for the several topics.

A dedicated website was set up (<http://ulis2011.ist.utl.pt/>). This website provided up-to-date information about the conference, topics, committees, organizing team, program, etc and also allowed the registration of participants and abstract submission. The advanced abstract submission system allowed an automatic formatting of the papers for the Book of Abstracts, topic distribution, author indexing, paper reviewing and referee decision, etc.

The First and Second Calls for Papers for ULIS 2011 were widely distributed by the following channels:

- a specific mailing list gathered from previous conferences (>500 addresses);
- the mailing list of the European laser network LASERLAB Europe (26 research labs from 16 European countries);
- the mailing list of the Portuguese laser network RTL (70);
- the internal mailing list of IPFN (150).

Additionally, the conference was promoted through the IPFN web and Facebook pages.

Abstract submission was open from July 15 to September 11 (extended deadline), with the paper acceptance being communicated on September 15.

## Sponsoring

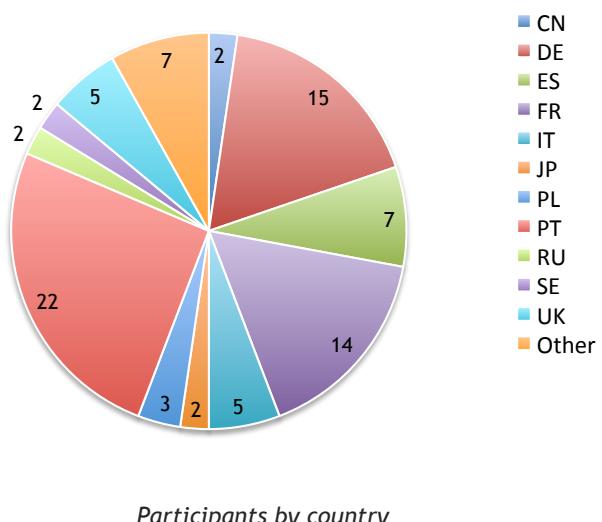

The organizing team requested financial support from SILMI, which was awarded. Support was also asked from private companies (laser and optics manufacturing and distribution) in the form of four levels of “commercial sponsorship”, allowing several levels of participation and representation at the conference. Despite the efforts, only one company (Amplitude Systèmes, France) became involved in the sponsoring.

## Participants

A total of 86 participants attended the conference. Of these, 34 (~40%) were students, and the remaining were senior researchers or professors.

Participants came from a total of 18 countries from Europe and Asia. The largest participations were those from the host country (22 participants), followed by Germany (15), France (14) and Spain (7). The graph below shows the corresponding country distribution.

Some of the most relevant research institutions in this scientific area were well represented at the conference: MPQ Garching (DE), ICFO (ES), CEA, CELIA, LOA, LULI (FR), INFN Frascati, Politecnico di Milano (IT), GoLP/IPFN (PT), CLF, Imperial College (UK), among many others.

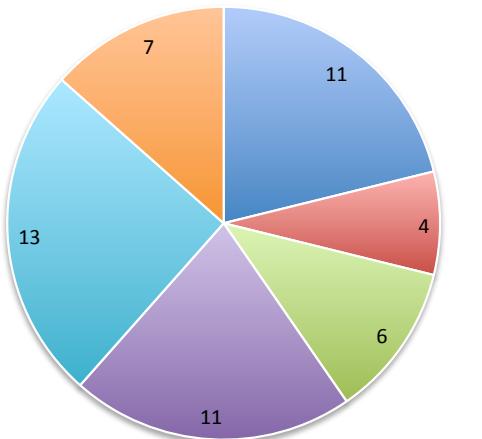

## Contributions

A total number of 66 papers were presented at ULIS, distributed as follows:

- 26 invited talks
- 26 submitted talks
- 14 posters

The graph below shows the corresponding distribution per topic.

- New Laser Sources: High Energy – High Power
- Fundamental Processes at Ultra-High Intensity
- Advanced IFE Schemes incl. Fast Ignition and Shock Ignition
- Laser-driven Particle Accelerators and their potential uses
- Secondary Sources, Applications and Radioprotection Issues
- Attosecond Science

*Submitted contributions by topic*

## Venue and accommodation

The chosen venue was the Centro Cultural de Belém (CCB) conference center - a first class infrastructure providing full logistic and technical support for high-level international events and meetings (<http://wwwccb.pt/sites/ccb/en-EN/CentrodeReunioes/Pages/default.aspx>). The conference room was “Sophia de Mello Breyner”, which was perfect for the number of participants.

Superbly located in the historically and monumentally rich Belém area, CCB is one of the top cultural destinations in Portugal. Participants were accommodated at the nearby Belém Jerónimos hotel, or at hotels near the city center.

*Conference room at CCB (left). Photograph during one of the sessions (right).*

## Scientific impact

The conference represented an excellent forum for discussion and exchange of ideas. The topics of advanced laser technology, new laser sources, HHG, attosecond generation and laser acceleration were particularly lively, with several recent and new, unpublished results being presented at ULIS for the first time. These are topics directly relevant to the objectives of SILMI.

The participation of students was strongly encouraged, both locally and from foreign institutions - namely, by applying a very reduced registration fee (75 EUR) in these cases. While most of them opted for presenting a poster paper, in several cases students delivered a talk, and even a few invited talks (S. Corde, F. Fiúza, P. Heissler).

## Committees

### Conference chairs

Marta Fajardo	IPFN Lisbon	Portugal
Gonçalo Figueira	IPFN Lisbon	Portugal
Luís Silva	IST Lisbon	Portugal

### International program committee

Stefano Atzeni	U Roma	Italy
André Bandrauk	U Sherbrooke	Canada
Dimitri Batani	CELIA Bordeaux	France
Dimitrios Charalambidis	U Crete	Greece
Sandro De Silvestri	Politecnico Milan	Italy
Marta Fajardo	IPFN Lisbon	Portugal
Gonçalo Figueira	IPFN Lisbon	Portugal
Antonio Giulietti	IPCF-CNR Pisa	Italy
Danilo Giulietti	U Pisa / INFN	Italy
Leonida Gizzi	INO-CNR	Pisa
Sylvie Jacquemot	LULI Palaiseau	France
Charles Joachain	UL Bruxelles	Belgium
Ruxin Li	SIOM CAS	China
Philippe Martin	CEA Saclay	France
Eric Mevel	CELIA Bordeaux	France
Katsumi Midorikawa	RIKEN	Japan
Luis Roso	CLPU Salamanca	Spain
Carl Schroeder	LBL	USA
Armin Scrinzi	LMU Muenchen	Germany
Luís Silva	IST Lisbon	Portugal
David Villeneuve	NRC	Canada
Claes-Goran Wahlström	U Lund	Sweden
Oswald Willi	U Duesseldorf	Germany
Kaoru Yamanouchi	U Tokyo	Japan

## Invited speakers

- Amelle Zaïr (Imperial College, UK) (*could not attend*)
- Andrius Baltuska (Tech. Univ. Vienna, Austria) (*replaced by D. Kartashov*)
- Daniele Tommasini (Univ. Vigo, Spain)
- David Ros (Univ. Paris-Sud, France)
- Eric Cormier (CELIA, France)
- Fernando Brizuela (Lund Univ. Sweden)
- Frederico Fiúza (IST, Portugal)
- Gareth Williams (IST, Portugal)
- Hamed Merdji (CEA Saclay, France)
- Hélder Crespo (Univ. Porto, Portugal)
- Jesus Alvarez (UPM, Spain)
- Jiansheng Liu (SIOM, China)
- Julien Fuchs (LULI, France)
- Junji Kawanaka (ILE, Japan)
- Kazutaka G. Nakamura (Titech, Japan)
- Lucas Gallmann (ETH Zurich, Switzerland)
- Marco Galimberti (RAL, UK)
- Michaël Hemmer (ICFO, Spain)
- Paris Tzallas (FORTH, Greece)
- Patrick Heissler (MPQ, Germany)
- Petra Koester (INO-CNR, Italy)
- Rodrigo Lopez-Martens (LOA, France)
- Salvatore Stagira (Politecnico di Milano, Italy)
- Sébastien Corde (LOA, France)
- Sébastien Hulin (CELIA, France) (*replaced by D. Batani*)
- Toma Toncian (Univ. Dusseldorf, Germany)

## Final program

Monday		Tuesday		Wednesday		Thursday	
8:30	Registration	8:30	Registration	8:30	Registration	8:30	Registration
8:50	OPENING						
9:00	Baltuska	9:00	Fuchs	9:00	Ros	9:00	Heissler
9:25	Kawanaka	9:25	Liu	9:25	Brizuela	9:25	Gallmann
9:50	Galimberti	9:50	Corde	9:50	Nakamura	9:50	Stagira
10:15	Khrenikov	10:15	Schnell	10:15	Ciappina	10:15	Gonoskov

## Invited talks

Title	Authors
The PETAL+ Project: Development of the diagnostics for the PETAL laser system	D. Batani, S. Bastiani, N. Blanchot, E. Brambrink, A. Casner, T. Ceccotti, S. Dobosz-Dufresnoy, J. E. Ducret, A. Duval, J. Fuchs, F. Gobet, S. Hulin, M. Koenig, I. Lantuejoul-Thfoin, J. R. Marquès, J. L. Miquel, C. Perego, C. Reverdin, L. Sérali, M. Tarisien, R. Wrobel
The Vulcan facility re-commissioning and future project	M. Galimberti
Advanced Technology for High-Energy, High-Field Lasers at Osaka University	J. Kawanaka, LFEX Team, GENBU Team, GEKKO EXA Team
XUV pump-probe studies in sub-fs time scale	P. Tzallas, E. Skantzakis, L. A. Nikolopoulos, G. D. Tsakiris, D. Charalambidis
Laser-Plasma Interaction Studies on Plane Targets in a Shock Ignition Relevant Regime	P. Koester, C. A. Cecchetti, L. Labate, T. Levato, A. Giulietti, L. A. Gizzi, L. Antonelli, A. Patria, M. Kozlova, J. Nejdl, M. Sawicka, D. Margarone, B. Rus, D. Batani, G. Schurtz, X. Ribeyre, M. Lafon, A. Moretti, M. Richetta, L. Giuffrida, L. Torrisi, C. Spindloe, T. O'Dell, S. Atzeni, A. Schiavi, A. Marocchino

<b>Generation of high photon-flux HHG at Lund University</b>	F. Brizuela, P. Rudawski, C. M. Heyl, J. Schwenke, A. L'Huillier
<b>Pushing limits in the mid-IR - High average power, few-cycle OPCPA and applications</b>	M. Hemmer, A. Thai, M. Baudisch, J. Biegert
<b>All-Optical Spectroscopy for the Attosecond Domain</b>	L. Gallmann, M. Holler, F. Schapper, U. Keller
<b>Towards single attosecond pulses from relativistically oscillating mirrors</b>	P. Heissler
<b>Multi-scale PIC modeling of laser-plasma interactions in high density scenarios</b>	F. Fiúza, R. A. Fonseca, L. O. Silva, J. Tonge, W. B. Mori
<b>Latest developments in laser wakefield accelerators at SIOM</b>	J. Liu, W. Wang, H. Lu, C. Xia, W. Cheng, M. Liu, A. Deng, W. Li, H. Zhang, J. Xu, X. Liang, Y. Leng, X. Lu, C. Wang, J. Wang, B. Shen, K. Nakajima, R. Li, Z. Xu
<b>Probing dense plasma states with high order harmonics</b>	G. Williams, M. Fajardo, S. Kunzel, P. Zeitoun, A. Barszczak, J. Gautier, G. Dovillaire, P. Mercère, J. Dunn, R. Shepherd, A. Graf, R. Lee, A. Steel, J. Park, J. Wark, S. Vinko, O. Círicosta, C. Blancard, M. Cammarata, D. Fritz, D. Milathianaki, H. J. Lee, B. Nagler, P. Audebert, A. Levy, M. Gauthier, J. Fuchs, H.K. Chung, C. Fourment, F. Deneuville
<b>Molecular internal dynamics studied by quantum path interferences within high order harmonic generation</b>	A. Zaïr, T. Siegel, S. Sukiasyan, C. Hutchison, P. Salieres, M. Ivanov, J. Marangos
<b>Measurement of magnetic field dynamics in dense plasmas irradiated by short pulse lasers</b>	B. Albertazzi, P. Antici, J. Bocker, S. Chen, V. Dervieux, L. Lancia, M. Nakatsutsumi, H. Pépin, L. Romagnani, M. Swantusch, O. Willi, M. Borghesi, J. Fuchs
<b>Ultra high repetition rate, few cycles CEP stabilized source at 2 microns for strong field physics</b>	J. Nillon, S. Montant, G. Machinet, E. Cormier
<b>Attosecond control of collective electron motion in laser-driven plasmas</b>	A. Borot, A. Malvache, X. Chen, P. Audebert, J.-P. Geindre, G. Mourou, F. Quéré, R. Lopez-Martens
<b>Ultrafast nanoscale imaging using high order harmonic generation</b>	H. Merdji
<b>LASERIX: an open facility for developments of soft X-ray and EUV lasers and applications</b>	D. Ros, S. Kazamias, O. Guilbaud, K. Cassou, S. Daboussi, M. Pittman, J.-C. Lagron, B. Cros, G. Maynard, Ph. Zeitoun
<b>Testing QED and new physics models by searching for light by light diffraction at Ultraintense Lasers</b>	D. Tommasini
<b>Application of Ultraintense Lasers to validate materials for laser fusion: production of ions and other relevant species</b>	J. Alvarez, D. Garoz, K. Mima, A. Ribera, R. Gonzalez-Arrabal, J.M. Perlado, K.A. Tanaka, K. Kikuyama, T. Kono, Y. Hirooka, I. Ashikawa, K. Kondo, M. Nishiuchi, T. Tanimoto, P. Alexander
<b>Recent progresses in Betatron Radiation from Laser-Plasma Accelerators</b>	S. Corde, K. Ta Phuoc, R. Fitour, J. Faure, C. Thaury, A. Lifschitz, G. Lambert, O. Lundh, E. Benveniste, A. Ben-Ismaïl, L. Arantchouk, A. Marciak, A. Stordeur, P. Brijesh, A. Specka, V. Malka, A. Rousse
<b>Generation of high harmonics from corrugated targets irradiated at relativistic intensities</b>	T. Toncian, M. Cerchez, A.L. Lindemann , C. Peth , M. Toncian , B. Albertazzi , J. Fuchs, O. Willi
<b>Optical control of coherent phonons in superconductors</b>	K. G. Nakamura
<b>High order harmonics driven by infrared parametric sources: applications to attosecond science and molecular orbital tomography</b>	C. Vozzi, M. Negro, F. Calegari, F. Frassetto, K. Kovacs, C.
