

## Research Networking Programmes

### Science Meeting – Scientific Report

The scientific report (WORD or PDF file - maximum of seven A4 pages) should be submitted online within two months of the event. It will be published on the ESF website.

**Proposal Title:** 6th European Cell Mechanics Meeting

**Application Reference N°:** 5530

#### 1) Summary (up to one page)

The 6<sup>th</sup> European Cell Mechanics meeting (CellMech) was held in Barcelona, Spain from the 13<sup>th</sup> to the 15<sup>th</sup> of May 2015, with the generous support of Quantissue. The meeting was a major success in terms both of attendance and the scientific program. A total of 195 people registered for the meeting, of which 30 gave oral presentations and 101 presented posters. Those numbers were at the very high end of our attendance estimates, and we almost reached the absolute maximum of people that we could attend in our venue. The program included sessions on cell migration, cell-matrix interactions, the cytoskeleton, cell mechanics in disease, development, and differentiation, mechanosensing, cytoskeleton-membrane interactions, cell-cell adhesion, and new technical approaches. Further, we held a round table discussion dedicated to publishing in the mechanobiology field, with editors from the most significant journals in the field. With the financial help of Quantissue, we could invite renowned guest speakers from all around the world including Christopher Chen (Boston University), Alpha Yap (University of Queensland, Australia), and several European speakers. Apart from the talks given by invited speakers, most talks in oral sessions were given by students or post-docs who presented work selected from submitted abstracts. Further emphasizing the role of junior scientists, we also awarded prizes to the best short talk and poster presented by a student or post-doc. A more detailed view of the final program can be found at <http://www.ibecbarcelona.eu/events/CellMech-2015/>. Given the increasing success and attendance rates of the biennial CellMech meeting, its advisory board already decided to confirm the next edition of the meeting in 2017 in Sheffield, UK.

**2) Description of the scientific content of and discussions at the event (up to four pages)**

The meeting was organized in 10 scientific sessions fully covering the field of cell mechanics. The topics of each session were:

- 1) Cell Migration
- 2) Cell-matrix interaction
- 3) Cytoskeleton
- 4) Cell mechanics and disease
- 5) Mechanotransduction
- 6) Cytoskeleton-membrane interaction
- 7) Cell mechanics in development and differentiation
- 8) Cell mechanics and rheology
- 9) Cell-cell adhesion
- 10) New techniques in cell mechanics

Each scientific session comprised one 45 min keynote lecture by a renowned speaker and three 20 min presentations from contributed abstracts. There was ample time for questions and answers after each talk. Speakers presented highly innovative and usually unpublished work that contributed to lively discussions. Below is a selection of 10 Scientific Highlights of the meeting:

- 1) Matthieu Piel (Institut Curie) presented a groundbreaking analysis of how the nucleus of living cells breaks and self-repairs when migrating through small pores.
- 2) Ulrich Schwarz (University of Heidelberg) presented a new analysis of cellular dynamics using a Pott's model. The model could have very significant impact to understand mechanical functions such as cell migration and division.
- 3) Laurent Blanchoin (CEA, Grenoble) presented new data regarding the interaction of actin and myosin motors in vitro. This interaction mediates non-trivial out-of-equilibrium dynamics that might underlie muscle function in vivo.
- 4) Gisje Koenderink (FOM Institute Amolf) presented new findings regarding the organization of biopolymers in living cells. She focussed on the interaction between actin and microtubules, a poorly understood interaction.
- 5) Christopher Chen (Boston U) presented a study of cell migration in three dimensions using electrospun polymer fibers. Because these fibers are elastic and non-degradable they offer the possibility of visualizing deformations and inferring forces.
- 6) Pierre François Lenne (IBDM, France) presented his new study of cell rearrangements in epithelial tissues. He focussed on the mechanisms of junction relaxation after a T-transition. Interestingly, unlike previously thought, he showed that junction elongation after a T1 event is an active process driven by medial myosin.
- 7) Kristina Franze (Cambridge University) talked about the control of neural growth by mechanics. He analysed the mechanisms of axon bending during neural growth.

8) Ewa Paluch (University College London) presented new mechanisms of cell migration under confinement. These mechanisms are independent of the well-known crawling mechanism based on integrin adhesion.

9) Alpha Yap (Queensland University) presented a new feedback loop that controls cell contractility at cell-cell junctions. The mechanism is determined by the concentration of junctional E-cadherin.

10) Jérôme Solon (Center for Genomic Regulation) discussed the mechanisms that drive dorsal closure and head involution in *Drosophila*. His analysis unveiled new mechanisms of cell contraction independent of myosin.

Besides the discussions of new scientific findings the meeting also featured a round table with editors from the top journals in the field:

- Laurent Blanchoin      Editor, Biophysical Journal
- Christopher Chen      Editor, Journal of Cell Science
- Ramon Farré      Editor, European Respiratory Journal
- Ewa Paluch      Editor, eLife
- Pep Pàmies      Editor, Nature Materials
- Alpha Yap      Editor, Molecular Biology of the Cell

The editors debated on the following questions:

- Why is your journal interested in mechanobiology?
- What features do you expect of a mechanobiology-oriented paper for a successful submission to your journal?
- Do you value interdisciplinarity, or do you expect a specific focus on the core discipline of your journal?
- How do you see the current boom of mechanobiology research: the dawn of a new field or a passing fad?
- Do you think the highly interdisciplinary, theoretical, and experimental nature of mechanobiology research is correctly covered by current journals? Do you think a specific mechanobiology-oriented interdisciplinary journal would make sense?

After an initial debate between editors, the discussion was opened to the audience.

A scientific highlight of the conference was the two poster sessions, which spanned the most recent trends of this wide and multidisciplinary field. Topics included innovative experimental approaches to probe cell mechanics and visualize dynamic cellular processes, together with the development of new theoretical and numerical concepts dedicated to cell and tissue engineering.

**3) Assessment of the results and impact of the event on the future directions of the field (up to two pages)**

The European Cell Mechanics meeting is the premier meeting in cell mechanics in Europe and possibly worldwide. Most laboratories working in the field were present, including labs from the US and Asia. As such, the impact of the meeting was very significant in several regards.

- a) The most recent findings in the field were presented. Because most of these findings were unpublished at the time, the meeting represented a significant step in the progress of the field. The meeting helped shape the future directions of the field.
- b) Most attendees were young researchers. This reflects the growing nature of the field. Many of these young researchers presented their research for the first time. Importantly, the meeting offered these researchers the opportunity to begin networking at a very early stage of their career.
- c) The meeting allowed ample time for discussions between attendees. A number of collaborations were setup during these discussions.
- d) Even if most attendees came from foreign countries, the meeting also allowed the local community in Cell Mechanics to improve its connection.
- e) The 7<sup>th</sup> and 8<sup>th</sup> European Cell Mechanics meetings were assigned to Sheffield (September 2017) and Milan (September 2019).

**4) Annexes 4a) and 4b): Programme of the meeting and full list of speakers and participants**

6th European Cell Mechanics Meeting  
**CellMech 2015**  
BARCELONA 13-15th May

**Wednesday May 13th**

8:00 – 8:30	Registration
8:30 – 9:00	Welcome
9:00 – 9:45	Matthieu Piel - Institute Curie, France <i>DEFORMATION, DAMAGE AND REPAIR OF THE CELL NUCLEUS DURING CELL MIGRATION</i>
9:45 – 10:45	<b>S.1- CELL MIGRATION</b> Tamal Das: <i>A MOLECULAR MECHANOTRANSDUCTION PATHWAY REGULATES COLLECTIVE CELL MIGRATION</i> Anna Labernadie: <i>PHYSICAL FORCES DRIVING FIBROBLAST-LED CANCER CELL MIGRATION</i> Lena Lautscham: <i>STERIC HINDRANCE IN 3D MIGRATION - WHICH CELL PROPERTIES MATTER?</i>
10:45 – 11:15	Coffee break
11:15 – 12:00	Ulrich Schwarz - University of Heidelberg, Germany <i>CONTROLLING CELL SHAPE AND FORCES BY SUBSTRATE DESIGN</i>
12:00 – 13:00	<b>S.2- CELL-MATRIX INTERACTION</b> Balcioglu Hayri Emrah: <i>INTEGRINS AND ASSOCIATED CELL-MATRIX ADHESION PROTEINS IN CELLULAR MECHANOTRANSDUCTION</i> Karin Jansen: <i>EXTRACELLULAR MATRIX MECHANICS AND IMPLICATIONS FOR CELLULAR MECHANOSENSING</i> Jorge Escribano: <i>3D DISCRETE MODELING OF CELL-ECM ADHESION</i>
13:00 – 14:00	Lunch / Poster Session I
14:00 – 14:45	Laurent Blanchoin - Institute of Life Sciences Research and Technologies (iRTSV), France <i>SYMMETRY AND MECHANICS OF CONTRACTILE ACTIN NETWORK</i>
14:45 – 15:45	<b>S.3- CYTOSKELETON</b> Martial Balland: <i>CELL MECHANICAL COMPASS BEHAVIOR</i> Daniel Hammer: <i>PROTRUSIVE AND CONTRACTILE FORCES OF SPREADING HUMAN NEUTROPHILS</i> Benjamin Wolters: <i>MODULATING THE TEMPORAL DELAY BETWEEN CALCIUM SIGNAL AND CELL CONTRACTION IN CARDIOMYOCYTES</i>
15:45 – 16:15	Coffee break
16:15 – 17:00	Gijsje Koenderink - FOM Institute AMOLF, Netherlands <i>STRUCTURAL HIERARCHY OF PROTEIN BIOPOLYMERS LEADS TO RICH MECHANICAL BEHAVIOR</i>
17:00 – 18:00	<b>S.4- CELL MECHANICS IN DISEASE</b> Jochen Guck: <i>INFLAMMATORY MECHANOSensitivity IS MODULATED BY MEMBRANE RESERVOIR IN MACROPHAGES</i> Jordi Alcaraz: <i>ABERRANT MECHANOBIOLOGY IN LUNG CANCER ASSOCIATED FIBROBLASTS</i> Sofia Dias: <i>THE BEHAVIOR OF EPITHELIAL CELL LINES EXPOSED TO LIQUID ENVIRONMENTS OF PERFLUOROCARBON: APPLICATION TO TOTAL LIQUID VENTILATION</i>
18:00 – 19:30	Poster Session I

**Thursday May 14th**

8:30 – 9:00	Registration
9:00 – 9:45	Christopher Chen - Boston University, USA <i>To be confirmed</i>
9:45 – 10:45	<b>S.5- MECHANOSENSING</b> Rene-Marc Mége: <i>FORCE-DEPENDENT BINDING OF VINCULIN TO <math>\alpha</math>-CATENIN CONSTITUTES THE CORE MECHANOSENSING MACHINERY OF CADHERIN ADHESIONS AND IS REQUIRED FOR COLLECTIVE CELL BEHAVIOR</i> Lorraine Montel: <i>ROLE OF ACTIN AND MYOCARDIN-RELATED TRANSCRIPTION FACTOR A IN THE MECHANOTRANSDUCTION OF THE MUSCLE CELL</i> Fidel Lolo: <i>IDENTIFYING MECHANOSENSING AND MECHANOTRANSDUCER ELEMENTS WITHIN CAVEOLAE</i>
10:45 – 11:15	Coffee break
11:15 – 12:00	Kristian Franze - University of Cambridge, UK <i>THE MECHANICAL CONTROL OF NEURONAL GROWTH IN THE DEVELOPING BRAIN</i>

#### Thursday May 14th

- 12:00 – 13:00 **S.6- CYTOSKELETON-MEMBRANE INTERACTION**  
 Nils Gauthier: *MEMBRANE TENSION PROVIDES THE FORCE REQUIRED FOR ADHESION POSITIONING*  
 Anita Kosmalska: *PHYSICAL PRINCIPLES OF MEMBRANE REMODELLING DURING CELL MECHANOADAPTATION*  
 Etienne Loiseau: *TENSION INDUCED SHAPE REGULATION OF ACTIVE CYTOSKELETAL VESICLES*
- 13:00 – 14:00 Lunch / Poster Session II
- 14:00 – 14:45 Pierre-François Lenne - Institute de Biologie du Développement de Marseille (IBDM), France  
*MECHANICS OF CELL-CELL CONTACTS DURING TISSUE MORPHOGENESIS*
- 14:45 – 15:45 **S.7- CELL MECHANICS IN DEVELOPMENT AND DIFFERENTIATION**  
 Jean-Léon Maître: *PULSATILE CELL-AUTONOMOUS CONTRACTILITY DRIVES COMPACTION IN THE MOUSE EMBRYO*  
 Ronen Zaidel-Bar: *ACTIN-BUNDLING PROTEIN PLASTIN/FIMBRIN REGULATES CORTICAL CONTRACTILITY IN EARLY C. ELEGANS EMBRYOGENESIS*  
 Shada Abuhattoum: *CELL MECHANICS AND FORCE GENERATION DURING ADIPOGENESIS*
- 15:45 – 16:15 Coffee break
- 16:15 – 17:15 Round table: Publishing in Mechanobiology  
 Laurent Blanchoin, Associate Editor (Biophysical Journal, Cytoskeleton)  
 Christopher Chen, Editor (Journal of Cell Science)  
 Ramon Farre, Associate Editor (European Respiratory Journal)  
 Ewa Paluch, Associate Editor (Biophysical Journal, Elife)  
 Pep Pàmies, Senior Editor (Nature Materials)  
 Alpha Yap, Associate Editor (Molecular Biology of the Cell, Developmental Cell, Current Biology).
- 17:15 – 18:45 Poster Session II
- 20:30 Conference Dinner – El Cangrejo Loco Restaurant (Moll de Gregal, 29-30 Port Olímpic)

#### Friday May 15th

- 8:30 – 9:00 Registration
- 9:00 – 9:45 Ewa Paluch - MRC Laboratory for Molecular Cell Biology, UK  
*ACTIN CORTEX MECHANICS IN ANIMAL CELL MORPHOGENESIS*
- 9:45 - 10:45 **S.9- CELL MECHANICS AND RHEOLOGY**  
 Kevin Chalut: *NUCLEAR MECHANICS AND SHAPE IN EMBRYONIC STEM CELLS EXITING PLURIPOTENCY*  
 Annafrancesca Rigato: *MECHANICAL MAPPING OF CELLS CONFINED ON MICROPATTERNS BY ATOMIC FORCE MICROSCOPY*  
 Wolfgang Goldmann: *BIOMECHANICAL BEHAVIOR OF MYOTUBES WITH A DESMIN R350P MUTATION*
- 10:45 – 11:15 Coffee break
- 11:15 – 12:00 Alpha Yap - University of Queensland, Australia  
*BUILDING ACTIVE TENSION AT CELL-CELL JUNCTIONS*
- 12:00 – 13:00 **S.10- CELL-CELL ADHESION**  
 Virgile Viasnoff: *3D BIOMIMETIC INTERFACES CONTROLLING CELL/CELL CONTACT MORPHOLOGIES AND CELL POLARIZATION*  
 Thomas Schmidt: *OUTWARD FORCE EXERTION IN MITOSIS*  
 Diego Vargas: *QUANTIFYING THE EFFECT OF INTRACELLULAR PATHWAY DYNAMICS IN INTERCELLULAR FORCES DURING COLLECTIVE MIGRATION: A MULTISCALE MODELING APPROACH*
- 13:00 – 14:00 Lunch
- 14:00 – 14:45 Jerome Solon - Centre for Genomic Regulation, Spain  
*CONTRACTING, SPREADING, FOLDING: HOW FORCES SHAPE BIOLOGICAL TISSUES DURING DEVELOPMENT*
- 14:45 – 15:45 **S.11- NEW TECHNIQUES IN CELL MECHANICS**  
 Jochen Guck: *REAL-TIME DEFORMABILITY CYTOMETRY: ON-THE FLY MECHANICAL PHENOTYPING FOR LABEL-FREE FUNCTIONAL CELL ASSAYS*  
 Marcelo Salierno: *THE ROLE OF DIMENSIONALITY IN CELL MIGRATION: NEW INSIGHTS WITH NOVEL IN VITRO PLATFORMS*  
 Jose Munoz: *NON-REGULARISED FINITE ELEMENT ANALYSIS FOR 3D TRACTION FORCE MICROSCOPY*
- 15:45- 16:15 Closing ceremony and Posters awards

# 6th EUROPEAN CELL MECHANICS MEETING ·CELLMECH 2015·

## Speakers list

N	NAME	INSTITUTION	COUNTRY
1	Laurent Blanchoin	Institute of Life Sciences Research and Technologies (iRTSV)	France
2	Christopher Chen	Boston University	USA
3	Kristian Franze	University of Cambridge	UK
4	Gijsje Koenderink	FOM Institute AMOLF	Netherlands
5	Pierre-François Lenne	Institute de Biologie du Développement de Marseille (IBDM)	France
6	Satyajit Mayor	National Centre for Biological Sciences	India
7	Ewa Paluch	MRC Laboratory for Molecular Cell Biology	UK
8	Matthieu Piel	Institute Curie	France
9	Jerome Solon	Centre for Genomic Regulation	Spain
10	Ulrich Schwarz	University of Heidelberg	Germany
11	Alpha Yap	University of Queensland	Australia

6th EUROPEAN CELL MECHANICS MEETING - CELLMECH 2015.

List of participants

Name	Surname	Affiliation	Country
Jorge-Pérezas	Alvaro	KU Leuven	Belgium
Van Oosterwyck	Hans	KU Leuven	Belgium
Bart	Smeets	KU Leuven	Belgium
Heck	Tommy	KU Leuven	Belgium
Izquierdo-Alvarez	Alicia	KU Leuven	Belgium
Iantoine	josephine	Université de Mons (Umons)	Belgium
danahe	mohammed	Université de Mons (Umons)	Belgium
Maryam	Riaz	University of Mons	Belgium
Geitmann	Anja	University of Montreal	Canada
Martinez	Karen	University of Copenhagen	Denmark
Cécile	GAUTHIER-ROUVIERE	CNRS - CRBM	Finland
Gaëlle	Letort	CEA	France
hajer	ennomani	CEA/DSV/IRTSV/PCV	France
